Oasis Trousers

STX84 157

Oasis is designed to meet the needs of those working in dynamic and operational environments, where practicality, durability and freedom of movement are essential. The ripstop fabric ensures enhanced reliability for everyday use, while the elasticated waistband and reinforced crotch provide comfort and functionality during more demanding activities.

The configuration of front and back pockets, a side cargo pocket and a ruler pocket allows tools and work accessories to be efficiently organised. The garment is completed with double stitching in high-stress areas, ensuring a solid construction designed for continuous professional use.
